The Final Avatar

The 'War on Terror' is really the 'War on Countries that don't have a Rothschild-owned Central Bank yet'!

The Rothschild family is slowly but surely having their Central banks established in every country of this world, giving them incredible amount of wealth and power.

In the year 2000 there were seven countries without a Rothschild owned Central Bank:

Afghanistan
Iraq
Sudan
Libya
Cuba
North Korea
Iran

The Attacks of September 11th were an inside job to invade Afghanistan and Iraq to then establish a Central Bank in those countries.

It is not a coincidence that these countries, which are listed above were and still are under attack by the western media, since one of the main reasons these countries have been under attack in the first place is because they do not have a Rothschild owned Central Bank yet. The first step in having a Central Bank establish in a country is to get them to accept outrageous loans, which puts the country in debt of the Central Bank and under the control of the Rothschilds. If the country does not accept the loan, the leader of this particular country will be assassinated and a Rothschild aligned leader will be put into the position, and if the assassination does not work, the country will be invaded and have a Central Bank established with force all under the name of 'fighting terrorism'.

Rothschild-owned Central Bank:

Central banks are illegally created private banks that are owned by the Rothschild banking family. The family has been around for more than 230 years and has slithered its way into each country on this planet, threatened every world leader and their governments and cabinets with physical and economic death and destruction, and then placed their own people in these central banks to control and manage each country's pocketbook. Worse, the Rothschilds also control the machinations of each government at the macro level, not concerning themselves with the daily vicissitudes of our individual personal lives. Except when we get too far out of line.

The only countries left in 2003 without a Central Bank owned by the Rothschild Family were:

Sudan
Libya
Cuba
North Korea
Iran

After the instigated protests and riots in the Arab countries the Rothschilds finally paved their way into establishing Central Banks, and getting rid of many leaders, which put them into more power.

The only countries left in 2011 without a Central Bank owned by the Rothschild Family are:

Cuba
North Korea
Iran

Take a guess as to whom we'll be attacking next!

Last I heard the US is running out of time to attack Iran. Looking for a false flag any day now.

Yeah, with Yidsrael constantly bleating about how America must attack Iran NOW! and the financial meltdown in Europe heading this way...and the Feds taking over and shutting down all mass media on Nov 9th (EAS 'Test'), yeah it could be just around the corner. And even without a false-flag, TSHTF soon enough, regardless!

Good job on the posting, Kalki. Good to see you, too, Sen10L!

You might be interested in a tract published in 1890 which confirms what you have to say. It also explains how

the jews have operated to remove businesses from White owners and to replace them with jewish control. An excerpt is here, along with a link to your article. Thanks for helping people to awaken to the power which is being used against them.

I read your linked post, but no proof or evidence is given about Jews preparing an anthrax epidemic. At this point it is just conjecture. I would like some evidence, if possible. Thanks.
